This book examines the first thirty years of Elizabeth I's reign from the perspective of the Valois kings, Charles IX and Henri III of France. Estelle Paraque sifts through hundreds of French letters and ambassadorial reports to construct a fuller picture of early modern Anglo-French relations, highlighting key events such as the St. Bartholomew's Day Massacre, the

imprisonment and execution of Mary, Queen of Scots, and the victory of England over the Spanish Armada in 1588. By drawing on a wealth of French sources, she illuminates the French royal family's shifting perceptions of Elizabeth I and suggests new conclusions about her reign.

Colonies Accademia Europea di Bolzano Japan, 1865, the women's palace in the great city of Edo. Bristling with intrigue and erotic rivalries, the palace is home to three thousand women and only one man - the young shogun. Sachi, a beautiful fifteen-year-old girl, is chosen to be his concubine. But Japan is changing, and as civil war erupts, Sachi flees for her life. Rescued by a rebel warrior, she finds unknown feelings stirring within her; but this is a world in which private passions have no place and there is not even a word for 'love'. Before she dare dream of a life with him, Sachi must uncover the secret of her own origins - a secret that encompasses a wrong so terrible that it threatens to destroy her

This textbook treats the broad range of modern acoustics from the basics of wave propagation in solids and fluids to applications such as noise control and cancellation, underwater acoustics, music and music synthesis, sonoluminescence, and medical diagnostics with ultrasound. The new edition is up-to-date and forward-looking in approach. Additional coverage of the opto-acoustics and sonoluminescence phenomena is included. New problems have been added throughout.

Canadian Perspectives Random House Controlling the level of noise in electrical motors is critical to overall system performance. However, predicting noise of an electrical motor is more difficult and less accurate than for other characteristics such as torque-speed. Recent advances have produced powerful computational methods for noise prediction, and Noise of Polyphase Electric Motors is the first book to collect these advances in a single source. It is also the first to include noise prediction for permanent magnet (PM) synchronous motors. Complete coverage of all aspects of electromagnetic, structural, and vibro-acoustic noise makes this a uniquely comprehensive reference. The authors begin with the basic principles of noise generation and radiation, magnetic field and radial forces, torque pulsations, acoustic calculations, as well as noise and vibration of mechanical and acoustic origin. Moving to applications, the book examines in detail stator system vibration analysis including the use of

finite element method (FEM) modal analysis; FEM for radial pressure and structural modeling; boundary element methods (BEM) for acoustic radiation; statistical energy analysis (SEA); instrumentation including technologies, procedures, and standards; and both passive and active methods for control of noise and vibration. Noise of Polyphase Electric Motors gathers the fundamental concepts along with all of the analytical, numerical, and statistical methods into a unified reference. It supplies all of the tools necessary to improve the noise performance of electrical motors at the design stage.

Safeguarding Traditional Cultures Springer Nature

Increasing numbers of people have connections with one country, but live and work in another, frequently owning property or investments in several countries. People with lifelong or subsequently developed impairments of capacity move cross-border or have property or family interests or connections spread across different jurisdictions. This new work fills a gap in a specialist market for a detailed work advising lawyers on all the considerations in these situations. The book provides a clear, comprehensive, and unique overview of all relevant capacity and private international law issues, and the existing solutions in common law and civil law jurisdictions and under Hague Convention XXXV. It sets out the existing law of various important jurisdictions, including detailed chapters on the constituent parts of the UK, Ireland, Jersey, the Isle of Man and the Hague 35 states; and shorter chapters on 26 Non-Hague states and those within federal states, including coverage of the United States, several Australian and Canadian states, and a number of other Commonwealth jurisdictions. Containing a number of helpful case studies and flowcharts, the book draws upon the expertise of the editors in their respective fields, together with detailed contributions from expert practitioners and academics from each relevant jurisdiction. All the editors and many of the contributors and correspondents are members of STEP.

The book aims to integrate our understanding of mammalian societies into a novel synthesis that is relevant to behavioural ecologists, ecologists, and anthropologists. It adopts a coherent structure that deals initially with the characteristics and strategies of females, before covering those of males,

cooperative societies and hominid societies. It reviews our current understanding both of the structure of societies and of the strategies of individuals; it combines coverage of relevant areas of theory with coverage of interspecific comparisons, intraspecific comparisons and experiments; it explores both evolutionary causes of different traits and their ecological consequences; and it integrates research on different groups of mammals with research on primates and humans and attempts to put research on human societies into a broader perspective.

How language users from different linguistic backgrounds cope with forms of complexity is still a territory with many unanswered questions. The current book is concerned with morphologically and syntactically complex items, that is, derivatives, inflected forms, compounds, phrases and forms related by agreement and examines how these constructions are acquired and learned in a great range of different languages, such as Turkish, Welsh, Basque and Catalan. Relying on a variety of methodologies targeting production or comprehension, among others, lexical decision and priming experiments, an EEG study, a corpus analysis and a reading test, the authors consider data from native speakers mastering one or more languages and second-language users. Overall, the volume reflects upon and contributes to our understanding of how the peculiarities of language and its users affect the learnability of complex forms.

Valentina me déteste autant que je la méprise. Cela ne m'a pas empêché de la kidnapper, de la voler pour la garder pour moi. Au fil des années qui nous ont séparés, la haine a grandi dans mon cœur. La fille que j'aimais autrefois est désormais devenue une femme, et elle croit appartenir à quelqu'un d'autre. En tant que narcotrafiquant réputé comme étant le plus sadique de la côte Ouest, j'aime le pouvoir et le contrôle. Son attitude de défi me tente et me tourmente, et je ne me lasserai jamais d'élaborer des punitions perverses pour la faire obéir. Elle ne peut pas échapper à mon toucher cruel et à ma discipline impitoyable. Personne ne me la prendra. Je tuerai quiconque essaiera. Valentina était censée devenir mienne. Rien ne m'empêchera de la posséder, corps et âme.

"Beauvoir in Time situates Simone de

Beauvoir's *The Second Sex* in the historical context of its writing and in later contexts of its international reception, from then till now. The book takes up three aspects of Beauvoir's work more recent feminists find embarrassing: "bad sex," "dated" views about lesbians, and intersections with race and class. Through close reading of her writing in many genres, alongside contemporaneous discourses (good and bad novels in French and English, outmoded psychoanalytic and sexological authorities, ethnographic surrealism, the writing of Richard Wright and Franz Fanon), and in light of her travels to the U.S. and China, the author uncovers insights more recent feminist methodologies obscure, showing Beauvoir is still good to think with today"--

If you loved *Fifty Shades of Grey* or Sylvia Day's *Crossfire* series, you'll love *Songs of Submission*...-----This omniedition contains the three novellas of *Sequence One*. It runs about 330 pages of print, or 95K words. Beg My name is Monica. I'm a singer born and raised in Los Angeles. I've stopped dating. When I cut a record, or win a Grammy, maybe then I'll be with someone, but every man in my past has done everything he could to make me submit myself to him, and it's gotten in the way of my career. I won't do it again. But there's Jonathan. He owns the high-rise hotel where I work, and he is gorgeous and charming. I refuse to fall in love with him, even though when he asks me to submit to him, I want nothing more. Tease When Jonathan was gone I couldn't stop thinking about him, and the first thing he did when he got back was demand more of me. I'm willing to give him my body and my time, but I find myself giving up pieces of my heart. My career is on track, and even though I can't write a thing, I can sing. So I'll go to the art opening with him, because his ex wife will be there. I feel this need to protect him from hurt, though in bed, his domination brings me to my knees. This man is going to break me into a million little

pieces. Submit "You're mine. The minute I told you to spread your legs and you did it, you were mine. When I told you to beg for it and you did, you were mine. When you put your hands behind your back without being told, I owned you. You never had to say a word. You are a natural submissive." No. God, no. My name is Monica, and no matter what Jonathan says, I am not submissive. ****18+ GRAPHIC LANGUAGE, SEX, AND ADULT SITUATIONS****

Elizabeth I of England through Valois Eyes
This book was inspired by the inaugural National Roundtable on Environmental and Sustainability Education in Canadian Faculties of Education (Roundtable 2016), which took place June 14-16, 2016, at Trent University in Peterborough, Ontario. Roundtable 2016 brought together over seventy participants from across Canada, including educators, researchers, policy-makers, consultants, and community organizations. Over the course of three days, participants took part in keynote addresses, research colloquia, networking socials, and collaborative inquiry activities focused on Environmental Sustainability Education in Teacher Education (ESE-TE). Roundtable 2016 resulted in the publication of a National Action Plan containing action-oriented recommendations for enhancing ESE-TE, and a position statement titled "The Otonabee Declaration," where delegates articulated their views regarding environmental degradation, the critical need for enhancing ESE-TE, and the role educators, children, youth, educational institutions, policy makers, and Indigenous communities play in enhancing ESE-TE in Canada. This volume concludes with a discussion placing current Canadian ESE-TE theory and practice within an international context.
