This book contains a
collection of research
papers on accounting
information systems
including their

strategic role in
decision processes,

within and between
companies. An

accounting system is a
complex system
composed of a mix of

strictly interrelated
elements such as data,
information, human
resources, IT tool,

accounting models and
procedures. Accounting
information systems

are often considered
the instrument by

default for accounting
automation. This book

aims to sketch a clear
picture of the current
state of AIS research,

including design, acceptance and reliance, value-added decision making, interorganizational links, and process improvements. The contributions in this volume emphasize that AIS has grown into a powerful strategic tool. The book provides evidence for this observation by examining a wide range of current issues ranging from theory development in AIS to practical applications of accounting information systems. In particular it focuses on themes of growing interest in the realm of XBRL and Financial Reporting, Management Information Systems, IT/IS Audit and IT/IS Compliance. The book will be of interest to financial and

managerial accountants and IT/IS practitioners, including information systems managers and consultants.

This revised and updated fifth edition of Accounting for Managers builds on the

international success of the previous editions in explaining how accounting is used by non-financial managers.

Emphasizing the interpretation rather than the construction of accounting information, *Accounting for Managers* encourages a critical, rather than an unthinking acceptance of accounting techniques. Whilst immensely valuable for planning, decision-making and control, users of accounting information need to recognize the assumptions behind, and the limitations of particular accounting techniques. As in the previous editions, the book links theory with practical examples and case studies drawn from real business

situations across a wide range of manufacturing, retail and service industries. *Making Decisions and Motivating*

Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be

applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization. Now in its Fourth

Edition, Kimmel, Weygandt, and Kieso's Financial Accounting: Tools for Business Decision Making has been tested and approved in the classroom. Whether you measure classroom success by improved grades, students who are better prepared for the Intermediate course and their future careers, or by student evaluations at the end of the semester, Financial Accounting delivers real results. "If you are teaching a debit/credit centered financial accounting principles class there is not a better written or organized text. Believe me I have looked. The supporting materials for instructors [are] also terrific." --Nancy Snow, University of Toledo "The textbook is

well written with good examples and homework problems. This book is easy to understand, but is rigorous in its coverage of accounting issues." -
-Paul Brazina, La Salle University, Philadelphia
"Best presentation of material in the industry. In addition, Financial, Managerial and Intermediate all flow together for greater coverage and comprehension." --
Vince Enslein, Clinton Community College
