In this third volume of The Deals of Warren Buffett,

we trace Warren Buffett's journey as he made

Berkshire Hathaway the largest company in

America. When we left Buffett at the end of

Volume 2, he had reached a fortune of \$1bn. In this

enthraling next instalment, we follow

Buffett's investment deals over the decade from

1989 to 1998, as Berkshire shares jumped

14-fold from \$4,700 to \$68,000 and its market

cap grew from \$5bn to \$100bn. This was a period

of Buffett's career when he was approaching

normal retirement age. But far from slowing

down, he was just hitting his stride. Buffett was as

driven as ever to seek out great companies at good

prices. By studying the decision-making that went

into his investment deals, and the successful and

unsuccessful outcomes, we can learn from Buffett

and become better investors ourselves. In

this decade, Buffett made investments in the

following companies: Wells Fargo, USAir, American Express, The Shoe Group, Helzberg Diamond Shops, RC Willey, FlightSafety International, Dairy Queen, Netjets, and General Re. For each of these deals, investing expert and Buffett historian Glen Arnold dives into unprecedented detail to analyse the investment process and the stories of the individuals involved. Arnold's engaging, lucid style transports the reader to the time and place of the deals, to truly appreciate how Buffett was operating. With stories and analysis drawn from decades of investing experience, join Glen Arnold and delve deeper into The Deals of Warren Buffett!

- In the current economy, many companies are priced lower than usual, therefore it's the perfect time for value investing.
- Includes insight from traders who have understood stock price behavior, and achieved enviable performance records.
- Intellectually rigorous without being academically turgid. Value Investing is an investment strategy that generally involves buying shares in companies that appear under priced, It's considered to be cautious, or contrarian approach to investing but for most value investors it has delivered huge returns. The ideas derive from the investment theories of Ben Graham and David Dodd who taught at Columbia Business School in the 1920's. Famous proponents include Warren Buffett, John Templeton, Charlie Munger, Joel Greenblatt and Anthony Bolton.

Corporate Financial Management, 3/E McGraw-Hill Education
 "... a must read for those wanting to craft a vocation in finance." -- Adrian Gore, CEO, Discovery Group; "... no better book for a student or practitioner who wants

more than is usually on offer in finance courses in our universities.” -- Paul Oslington, Professor of Economics and Dean of Business, Alphacrucis College, Sydney. To develop a vocation we ask: what do I want to be remembered for? This involves aspiring to personal integrity and a life well lived. Those working in the financial sector fulfill vocations by finding ways to serve social purposes, to allocate resources efficiently and to provide financial security—while remembering the needy. This means contributing to institutions, where people can flourish personally and create appropriate products and services. The ethics of those working on finding their vocation do not flow from rules and obligations, but from a personal commitment to seeking what is good. This life is based on the fundamental personal virtue, integrity. This book is written for those who aspire to the cultivation of the personal virtues of wisdom, self-control, courage, and justice.
