Testosterone: Myths

u0026 Facts Mass Spectrometry In Sports Drug Testing The versatility of modern mass spectrometers enable specific as well as comprehensive measurements allowing sports drug testing laboratories to determine the misuse of

therapeutics such as anabolic-androgenic steroids, stimulants, masking agents or so-called designer drugs in athletes' blood or urine specimens, and a selection of recent developments is summarized in this review. © 2006 Wiley Periodicals, Inc., Mass Spec Rev 26:79-107, 2007 Mass spectrometry in sports drug testing: Structure ... Overview. Detection of New Anabolic and Endurance Enhancing Agents. Liquid chromatography

interfaced to tandem mass spectrometry (LC-MS/MS) has become an important tool in modern doping control analysis [1]. The flexible and robust nature of LC-MS/MS systems is used to determine known drugs and, more recently, also for emerging therapeutics [2]. Detection assays for new anabolic agents (selective androgen receptor modulators) [3] and endurance-enhancing compounds (benzothiazepines) [4] not ... Mass Spectrometry in Sports Drug Testing -

2010 - Wiley ...Mass spectrometry has become essential to sports drug testing. This book examines both the principles of sports drug testing and the use of mass spectrometry techniques and mass spectral data to detect, identify, and characterize hundreds of known and unknown drugs that athletes may use to enhance their performance.
